Definition of Serious Health Condition

A “Serious Health Condition” means an illness, injury, impairment, or physical or mental condition that involves one of the following:

1. Hospital Care
   **Inpatient care** (i.e., an overnight stay) in a hospital, hospice, or residential medical care facility, including any period of incapacity or subsequent treatment in connection with or consequent to such inpatient care.

2. Absence Plus Treatment
   (a) A period of incapacity** of **more than three consecutive calendar days** (including any subsequent treatment or period of incapacity** relating to the same condition), that also involves:
      (1) **Treatment*** two or more times** by a health care provider, by a nurse or physician’s assistant under direct supervision of a health care provider, or by a provider of health care services (e.g., physical therapist) under orders of, or on referral by, a health care provider; or
      (2) **Treatment** by a health care provider on **at least one occasion** which results in a **regimen of continuing treatment**** under the supervision of the health care provider.

3. Pregnancy
   **Any period of incapacity due to pregnancy**, or for **prenatal** care.

4. Chronic Conditions Requiring Treatments
   A **chronic condition** which:
      (1) Requires **periodic visits** for treatment by a health care provider, or by a nurse or physician’s assistant under direct supervision of a health care provider;
      (2) Continues over an **extended period of time** (including recurring episodes of a single underlying condition); and
      (3) May cause **episodic** rather than a continuing period of incapacity (e.g., asthma, diabetes, epilepsy, etc.).

5. Permanent/Long-term Conditions Requiring Supervision
   A period of **incapacity**** which is **permanent or long-term** due to a condition for which treatment may not be effective. The employee or family member must be **under the continuing supervision of, but need not be receiving active treatment by, a health care provider.** Examples include Alzheimer’s, a severe stroke, or the terminal stages of a disease.

6. Multiple Treatments (Non-Chronic Conditions)
   Any period of absence to receive **multiple treatments** (including any period of recovery therefrom) by a health care provider or by a provider of health care services under orders of, or on referral by, a health care provider, either for **restorative surgery** after an accident or other injury, or for a condition that would likely result in a period of incapacity of **more than three consecutive calendar days** in the absence of medical intervention or treatment, such as cancer (chemotherapy, radiation, etc.), severe arthritis (physical therapy), kidney disease (dialysis).
